### **Culture and Planting Information:**

Ginkgo is considered the world's oldest living tree species and can live for hundreds of years. It is one of the most adaptable tree species and can grow in a variety of conditions. Its tolerance of air pollution and salt make it ideal for urban environments and along streets. Autumn Gold Ginkgo is a male cultivated variety, and does not produce the foul smelling fruit associated with female Ginkgo trees. Due to its height, Autumn Gold Ginkgo should not be planted where overhead utility wires are present.
